PROJECTS

MEASURE AUTHORIZING TOOL (MAT)

- A java web application designed through many open source products. Includes Google Web Toolkit (GWT) framework, Java JDK, and MySQL for the backend database server.

STORM

- Created a weather app in java using Android Studio. I used OkHttp for HTTP requests from darsky.net and JSON parsing for the app data.

WORK EXPERIENCE

INTERNSHIP

Telligen / Des Moines, IA / Summer 2019

- Coded in an Agile environment with sprints every two weeks involving implimentation of new features and bug fixes for the MEASURE AUTHORIZING TOOL Java web application.
- Held meetings everyday with the scrum team, we used Telligen Quickbuild, Jira, and BitBucket for team collaboration.

LEAD IT SPECIALIST

IT Solution Center / Ames, IA / 2017-Present

- Provide technical knowledge to troubleshoot issues involving VDI, VPN, networking, Cisco phone administration, hardware, and password resets for students and faculty of Iowa State University.
- Train new employees about technical and communication skills.
